- Stainless steel housing
- 2-way mounting: stand/hang

Patent Pending

Conserve energy by maintaining proper temperatures!

The PA80 is oil-filled for delayed response so that the temperature reading is not affected when opening the door.

Operating Instructions

A. With Rack

1. Snap the clip onto the thermometer stem and slide it up to the back of the dial.
2. **Underside of rack** - Push the small end of the clip up through the rack in the desired location, slip the clip over the rack wire, and pull downward to lock into position.
3. **Top of rack** - Push the small end of the clip down through the rack in the desired location, slip the clip over the rack wire, and pull upward to lock into position and rest the thermometer on the rack.
4. Rotate the dial to adjust for easy reading.

B. Without Rack

Place the thermometer on its side in a convenient location. Use clip to prevent rolling.

Note: Allow 8 hours for the first accurate temperature reading.
