36. Thermometers provided and accurate
Thermometers provide a means for assessing active managerial control of TCS food temperatures. Determine compliance by observing the in-use storage location and verifying the scaling of the temperature measuring devices in the range of use to measure food, water, or ambient air temperatures. Food thermometers must be calibrated at a frequency to ensure accuracy. Food thermometers should be accessible for use by employees and have a probe size appropriate to the food item.

Applicable Code Sections:

A GLOBAL CATEGORY LEADER

CDN is a global category leader in kitchen measurement tools, known for quality and innovation for over 35 years.

Our measurement tools range from the basic to the unique. CDN has the right instrument to help you streamline your operation — from receiving product to cooking, storing, serving and cleaning. Foodservice professionals rely on CDN products, which are used in over 20,000 foodservice locations worldwide, including large international coffee and restaurant chains.

CDN was named "Best Overall Company" in its category by the prestigious Stevie Awards for Women in Business. We are also a certified member of the Women's Business Enterprise National Council (WBENC), providing additional benefits to our customers.

SOCIAL RESPONSIBILITY

CDN strives to maintain a balance between the economy and the ecosystem by choosing innovative technologies and programs that reflect our sensitivity towards social, cultural, economic, and environmental issues.

SUPERIOR QUALITY

All stainless steel is not the same. CDN thermometers are made of a premium grade stainless steel, which is superior to the stainless used in many other thermometers. CDN bimetal thermometer stems are welded to a calibration nut. Less expensive thermometers are only pressed together. The dip in the stem of our bimetal thermometers indicates the place where the temperature coil is welded to a special tubing and where you will get the most accurate reading. This extra measure provides an additional degree of stability and accuracy, and is unique to CDN. National Sanitation Foundation is an approval agency that certifies that thermometers bearing the NSF® mark are manufactured to high commercial standards. Because of higher listing costs, only a select number of our thermometers carry the NSF® mark. However, all our dial thermometers are manufactured to NSF® standards in an NSF® Certified Facility. We use an incoming inspection program based on military QC standard MILQ9858.

BioCote®

This product does not protect users or others against food-borne bacteria. Always clean and wash this product thoroughly before and after each use.

Batteries included with all electronic products.
